45ft container delivery truck regulation

Dear Value customer,

We like to bring to your attention that not all trucks are suitable to carry 45ft container.

Therefore, we are instituting the following safety measure with immediate effect:

Those coming to take delivery of a 45ft container from the terminal must first contact our HSSE team to inspect their truck and confirm if it is suitable to tolerate a 45ft container.

Trucks that are not pre-inspected will not be accepted into the terminal for delivery.

We look forward to your continuous cooperation.

Please see below the relevant contact details:
