

Customer Advisory

Mandatory wearing of Face Mask and Social Distancing (June 10, 2020)

Please accept our compliments and sincere best wishes.

It has come to our attention that the COVID-19 precautionary measures recommended by the Government of Liberia and its health partners are not being followed by all customers.

As we are all aware, COVID-19 is a global pandemic that is affecting businesses and the world as a whole and can only be prevented if all measures are fully followed.

While we are fully cognizant of the urgency in clearing your cargo from the port, we are also deeply concern about the safety of all port users and our staff as well.

On basis of the above, we will like to inform all customers doing business with us to follow the precautionary measures 100% for the safety of themselves and their fellow customers.

The usage of mask and social Distancing is mandatory at all our offices; customers not wearing Mask or observing the recommended social Distancing guidelines at any of our offices will not be serviced until they comply fully.
